

What's New For 2016

E-Check Location

Olmsted Auto Care is now an E-Check testing location as well as a certified E-Check repair station. We can run an E-check on most 1996 and newer vehicles, call for appointment. If needed we can repair check engine lamp problems or failed emission problems. Our highly qualified techs will help you through the E-Check process. (We do not process waivers).
Call for Appt. 440-427-9310

Gulf Select Dealer

Olmsted Auto Care is now a Gulf Select service chemical and fluid distributor. What does this mean for you? We can help keep your car running at peak performance. If you are planning on keeping your vehicle for many years, it pays to be proactive on the maintenance of your vehicle.

For example, most vehicles now have antilock brakes, traction control and stability control features. These systems rely on the traditional braking system to help them perform optimally. Most manufacturers recommend replacement of the brake fluid at 2 or 3 year intervals. With the Gulf Pride Brake fluid replacement program, you can extend the life of the major braking components, restore proper brake pedal height and feel, and restore the function of your vehicles stability and traction control systems.

The Gulf Select products include Coolant system

service, Oil system service, fuel injection service, synthetic oil treatment, driveline service for four wheel drive and all wheel drive vehicles, power steering service, transmission service and diesel service. In addition fuel additives are available to combat the corrosive properties of the ethanol that is in most fuels. All products come with a maintenance protection plan if the first service is performed on your vehicle before 72,000 miles. Additional protection is provided if the first service is performed before 36,000 miles. Both have ongoing service intervals to maintain protection. Call for details.

Platinum Oil Service

To kick off this program we are offering a Platinum Oil Service, which includes an oil change and filter*, Gulf Select Oil System Cleaner Concentrate, Gulf Select Synthetic Oil Treatment and Gulf Select Tank Boost Fuel System Concentrate Treatment. This will maintain a cleaner engine, prevent horsepower loss and provide resistance to thermal and oxidative oil breakdown. All of this for \$79.95

*up to 5 qts of our synblend oil, additional oil, synthetic oil, special filter extra

Fleet Service

We now offer fleet vehicle service for several fleet providers including ARI and Enterprise. If your vehicle is covered under one of these plans, please give us a call for details. We would love to service your vehicle.

More Loaner Vehicles

We now have eight loaner vehicles for your convenience. They are available to all customers that have full coverage on the vehicle that we work on. They are available on a first come first serve basis and at no charge. Proof of current insurance and driver's license needed.
